## Pocket circuit racing parts yakuza kiwami

Game info One of the more difficult mini-games in Yakuza Kiwami is the Pocket Racing Circuit. Pocket Racing is Yakuza's takeover of RC races, where participants have to build and modify small RC cars and play them out against others on an RC race track. That's exactly what makes it such a tough activity, and it's even more involved here in Yakuza Kiwami than it is in Yakuza 0. How to unlock Pocket Circuit Racing Erste, make your way to Shichifuku Street West, the Pocket Circuit Stadium is at the western end of the road. As you approach, you'll meet the Pocket Circuit Fighter after talking to him a little bit, you'll have the opportunity to start the subhistory of the fighter's successor. You have to accept this subhistory to unlock Pocket Races as it will give you the Golem Tiger (your first RC car) and some spare parts. If you talk to him again afterwards, you will finally have the opportunity to participate in a tournament, adjust your car and even take part in test runs. It is not mandatory to complete the Fighter's Successor subhistory to participate in a tournament, but it is recommended as it gives you additional items. Completion of the fighter's sequel subhistory There is a great engine part that you can get, called Godspeed Motor Mark II, when you complete this subhistory, so you should do it before you start the tournament. After talking to the Pocket Circuit Fighter and giving you the Golem Tiger, head to Club Sega on Theater Avenue to continue with the subhistory. There you meet Hideki, after a series of sequences he will challenge you to a race at Pocket Circuit Stadium, return there and defeat him in a race. Then they go to Stardust until they see the look prompt coming. This will trigger another series of sequences, then go back to Pocket Circuit Stadium for another race. Finally, you will challenge the Pocket Circuit Fighter and run it. Where to buy Pocket Racing parts Buying new parts is really important and they are sold at different locations. The Pocket Circuit parts store is the obvious place, but you can also buy parts from the gun dealer in Westpark, the Ebisu Pawn Shop and even Don Quixote. Buy any part from each of these traders, you will need them. The only way you

will actually be able to compete seriously is to buy new parts and turn them off regularly. General racing strategyThe most difficult thing about Pocket Racing are just the random factors involved. Sometimes you lose a race just because your car happened to have flown off the track, and there's nothing you can do about it. You should practice each track at least once, just to for the layout to get before you really go for the win. It's easy to think that you'll just hammer on your boost button and get far ahead of the other cars, but if you try to do it this way, you'll probably just fly off the track even faster. Use Boost sparingly and wait for long stretches to use. Each car part has a different cost limit, and so every trace. For example, the Beginner Cup has a cost limit of 25, while the Pro-am Race costs 35. There's no all-end-all-car build that will win them every race, so you've got to experiment and see what works. Advertising. Scroll on to moreRacing Circuit Overview and Recommended Parts There are a total of 14 racetracks you need to win to finish the Pocket Racing minigame. Below are the details for each distance your car needs to travel, the cost limit for each route, the number of laps and the parts/cars we recommend. You should also follow our Lockers Guide so you know where to find the Cool Striker car, it will make some of these races much easier. Disclaimer: The recommended parts below that works for us, but as mentioned earlier, there is no-all-end-all auto-build for each track. There is a lot of RNG involved in this minigame and you can go into a race with the same build multiple times and get a different result every time, even if your roles and playing style don't change at all. Be patient with it and use Boost sparingly. Sometimes a competitor will start far ahead of you, but over time you will round them even without thrust. Know that your car can apparently fly off the track for no reason, regardless of playing style or build. Introductory Race Total Distance: 88.1m Cost Limit: 20 Laps: 8 Recommended Parts: Cool Striker, High Speed Battery, Speed Motor, Balanced Gears, Slick Tires, Balanced FrameLittle Racer Cup Total distance: 147.3m Total cost limit: 20 laps: 8 Recommended parts: Cool Striker, Speed Frame, Speed Motor, Regular Gearbox, Regular Battery, Soft TiresRookie Race Total distance: 196.1m Cost limit: 25 laps: 12 Recommended Parts: Cool Striker, Speed Frame Plus, Speed Speed Plus, Speed Balanced Gears Plus, High Speed Battery, Slim Tires PlusBeginner Cup Total distance: 195.7m Total distance: 25 laps: 8 Recommended Parts: Cool Striker, Spiked Tires, Speed Frame Plus, Speed Motor Plus, Balanced Gears Plus, Balanced Gears Plus, High Capacity Scroll on for moreAmateur Cup Total distance: 179.4m Cost limit: 25 laps: 8 Recommended Parts: Cool Striker, Extra Spiked Tires, Extra Metal Frame, Extra Speed , Extra Balanced Gears, High Speed BatteryStandard Cup Total Distance: 194.3m Cost limit: 30 laps: 8 Recommended parts: Cool Striker, Extra Slick Tire, Extra Metal Frame, Extra Speed Motor, Extra Balanced Gears, High Speed Battery, Medium SuspensionIntermediate Cup Total distance: 220.7m Total time limit: 30 laps: 8 Recommended Parts: Cool Striker, Extra Slick Tire, Super Rocket Frame, Super Speed Motor, Boost Gears Plus, High Capacity Battery, Medium SuspensionAdvanced Cup Total Distance: 223.9m Cost limit: 30 Laps: 12 Recommended Parts: Cool Striker, Super Slick Tires, Super Speed Speed, Super Speed High Capacity Battery, Medium SuspensionPro-am Race Total Distance : 238.6m Cost limit: 35 laps: 8 Recommended parts: Cool Striker, Ultra Slick Tire, Ultra Speed Frame, Super Super Motor, Extra Boost Gearbox, High Speed Battery, Medium Suspension Advertising. Scroll on for moreDeveloperRyu ga Gotoku StudiosSeriesYakuza Does anyone have a complete list where I can get Pocket Circuit parts from in Kiwami? I'm just getting my shit kicked by Takuma-Kun, so I definitely need better parts to beat him, but I can't find more than I have! Apart from the Pocket Circuit Store, I found parts at Don Quixote, the gun seller in West Park and the gun seller in the store. Please help, I want to destroy this stupid fuck. Page 2 10 Comments The Pocket Racing Circuit is considered one of Yakuza Kiwami's toughest mini-games. It's about RC racing and the competitors have to build and modify small cars and meet each other on a racetrack. How to unlock the circuit you have to go to Shichifuku Street West, and you will find the stadium at the end of the road on the western part. Here you have to talk to the Pocket Circuit Fighter and you will have the option to step into the fighter's substory. If you want to unlock the Pocket race, you have to accept the subhistory, because here they get your first car, the Golem Tiger and some car parts. When you talk to the fighter again, you can customize the car, make test runs and enter in the tournament. How to complete the Substory Fighter Successor? When you complete the subhistory, you can get the Godspeed Monitor Mark II and you should do so before you start the tournament. After receiving the Golem Tiger, go to Theater Avenue, in Club Saga, to start the subhistory. Here you will meet Hideki, and he will encourage you to drive at Pocket Circuit Stadium. Go there and do Best to beat him in the race. After this go to Stadust and you will see the prompt coming. After all the intermediate sequences, go back to Pocket Circuit Stadium and win another race. In the end will compete with the Pocket Circuit Fighter. Where to buy Pocket Racing parts? It is very important to buy new parts, and you can find them in many places. The shop is the obvious place, but you can find the parts at the dealers from West Park, at Don Quixote and in the Ebisu Pawn Shop. It is important to buy every part of all retailers because you need them. If you want to win the races, you have to buy parts and change them. The best racing strategy There are many factors that influence the finale of the race. You can lose a race because the car has flown off the track. In this case, you have nothing to do. It is very important to practice all the tracks just to learn the track before starting the race. You may think that is enough to press the boost button and be in front of the other cars, but this is a very risky strategy just because you can fly off the track very fast. You should use Boost rationally and wait for the right moment to use it. Each part has a price limit, and that's how it happens with the tracks. The price for the Beginner's Cup is 25 and the Pro-am Race has a price of 35. You won't win a car or a roll in every race, so you'll have to do tests to find out what works best for you. In this circuit you can visit 14 circuits and you need to win them to complete the minigame. We will show you all the details of each circuit. You need to know the distance you will cover, the price for each route, the lap number and the cars or parts recommended for each route map. What you will read below has worked for me, but you can find other optimal solutions to win this mini-game. You can use the same build for many times, and you can get different results even if you play the same all the time. You should be patient and remember that if a competitor is in front of you at the start, if you play well, you can round it out. Remember that you can fly off the road for no reason. The introductory race is 88.1 m long and has a price limit of 20. It has 8 laps and the recommended parts are Speed Frame, Regular Gears, Cool Striker, Soft Tires and Speed Motor. For the Little Racer Cup there is a track with 147.2 m length, a price of 20 and 8 laps. You need Cool Striker, Speed Monitor, Reagular Battery, Soft Tires and Regular Gears and Speed Frame. The Rookie Race is 196.1 m length. The price is 20 and it has 8 rounds. The recommended parts are Cool Striker, Speed Motor Plus, High Speed Battery, Speed Frame Plus, Slim Tires Plus. The Beginner Cup has a total distance of 196.1 m and a cost limit of 25. You will play 12 rounds and you will need Cool Striker, Speed Frame Plus, Spiked Tires, Geard Plus, Speed Monitor Plus and High Capacity Battery. The Amateur Cup is 179.4 m long and has a cost limit of 24. You will play 8 rounds and if you want to win, you will need Cool Striker, Extra Metal Frame, Extra Spiked Tires, Extra Balanced Gears, Extra Speed Monitor and High Speed Battery. For those who Cup you will play a race with 194.3m in 8 rounds, with a cost limit of 30. You need Cool Striker, Extra Metal Frame, Extra Balanced Gears, Extra Speed Monitor and Medium Suspension. Intermediate Cup is 220.7 m length in 8 laps and has a price limit of 30. You must have Cool Striker, Super Rocket Frame, Extra Slick Tire, Super Speed Motor, High Capacity Battery, Boost Gears Plus and Medium Suspension. Advanced Cup is 223.9 m length in 12 laps, and at a cost limit of 30. You must have Cool Striker, Super Speed Frame, Super Slick Tire, Boos Gears Plus, Super Speed Motor, Medium Suspension and High Capacity Battery. Pro-am Race is 238.6 m length in 8 laps and the cost limit is 35. You must have Cool Striker, Ultra Speed Frame, Ultra Slick Tire, Super Speed Motor, High Speed Battery, Extra Boost Gears and Medium Suspensions. Elite Cup is 192.6 m length in 8 laps and the maximum price is 35. We recommend Cool Striker, Ultra Rocket Frame, Ultra Slick Tires, Godspeed Monitor, High Speed Battery, Boost Gears and Medium Suspension. Expert race is 240.6 m length in 8 laps and with a price of 40. We recommend Cool Striker, Rubber Frame Plus, Ultra Slick Tires, Godspeed Motor, High Capacity Battery, Super Boost Gears and Medium Suspension. Master Cup is 262.1 m length in 12 rounds. The cost limit is 40. We recommend Cool Striker, Ultra Rocket Frame, Ultra Spiked Tires, Godspeed Motor, Ultra Boost Gears, Heavy Suspension and High Capacity Battery. Champion Cup is 220.6 m length in 4 rounds. The cost limit is 45 and we recommend Cool Striker, Ultra Rubber Frame, Ultra Spiked tires, Godspeed Engine, Regular Battery, Ultra Boos Gears, Heavy Suspension and Bumper Plate. 2005 King of Speed Cups is 256.8 m length in 12 laps. The cost limit is 45 and we recommend Cool Striker, Ultra Metal Frame, Ultra Slim Tires, Ultra Godspeed Motor, High Capacity Battery, Ultra Boost Gears, Heavy Suspension, High Capacity Battery and Bumper Plate.
